

Forefront of checkweighing technology

“Tailor-made” solution for your product

The HSC350 “C” series checkweigher is the compact, modular, cost-effective solution that integrates the quality control line when space is at a premium.

Sturdy and flexible, it can be easily fitted with a Metal detector plus display and labelling systems.

The system can be easily sanitized and hygienized thanks to its special shape, featuring flat, easily accessed surfaces.

Thanks to the innovative “Real Weight” dynamic measuring system, HSC350 can be used without the need for the calibration or product learning procedures required by the majority of the “peak weight” weighing machines available on the market.

Easy-to-use and intuitive software interface allows quick change of data and secure operations protected by password: up to 100 programs are saved in checkweigher’s memory.

Product features

Maximum weight
MID scale interval “e”
Maximum product width
Maximum product length
Maximum throughput

1500 g / 3 kg / 6 kg
0.5 g / 1 g / 2 g
up to 420 mm
up to 500 mm
up to 250 ppm

Machine features

Supply voltage
Machine heights

Operating temperature
Air supply
Environment protection
Belt Type
Control Panel

L1, N, PE, 230 V (+10% / -15%)
500 to 1,400 mm (adjustable feet \pm 50 mm)
0 – 40 °C
3 to 6 bar
IP54 (up to IP68)
Flat “food”
High contrast lcd display with keyboard

Options

Connection
Rejection

Statistics and reports

Control panel

RS232 COM, Ethernet, USB Data key
Integrated pusher, Automatic feedback correction
STAT350 pc software, Integrated printer
7” HD color touchscreen, 10” wide color touchscreen
